

## Gnanomat granted with 1.2 M€ from the “SME instrument” to scale up nanomaterials production and launch commercial activities

Madrid, August 12<sup>nd</sup>, 2016

Gnanomat receives 1.2 M€ from EU funds to build a production plant to produce graphene-based materials and launch its commercial activities. This funding is a definitive push to consolidate the company as a referent player of the nanomaterials sector.

Gnanomat applied to the Phase 2 SME-instrument in the H2020 program with the project called GRAPHEEN, receiving an excellent score. Only five projects out of 122 (4%) submitted in the area of the last call have been selected for funding, noting the high level of competition and the excellence of the proposed project.

### **About Gnanomat**

Gnanomat is a Spanish company established in 2014 involved in the emerging field of nanomaterials technology. Gnanomat counts on a patented technology to manufacture with efficient costs a wide variety of graphene-based nanomaterials. So far, we have demonstrated the versatility of our technology in the generation of a portfolio of 13 products with special interest in the energy storage area. In the following months, the company is launching its commercial activities by supplying of small-scale quantities of our products portfolio, while in the mid-long term our objective is to become a leading supplier of nanomaterials worldwide.

### **About SME Instrument**

The SME instrument is part of the Horizon 2020 program and finances the most innovative ideas with the highest market potential, proposed by SMEs along Europe. The SME instrument was designed specifically for highly innovative SMEs with international ambitions, determined to turn strong, innovative business ideas into winners on the market. The instrument provides full-cycle business innovation support from the stage of business idea conception and planning (phase I) over business plan execution and demonstration (phase II) to commercialization (phase III).
